Education

Georgia Institute of Technology, Atlanta, Georgia
B.S. Computer Science

May 2019

Work Experience

OneTrust, Atlanta, Georgia

July 2019 - June 2022

Software Engineer (Front End)

- Delivered 50+ features to meaningfully contribute to the company's fast growth within the data privacy market
- Collaborated with developers and product managers in daily standups, code reviews, and retrospectives to maintain consistency and improve productivity
- Produced automation test cases for new features to cover regression and apply the fundamentals of behavior driven development
- Implemented unit tests to establish code coverage across the application increasing coverage from 0% to a 70% threshold requirement
- Investigated production support tickets and performed root cause analysis to improve product functionality and customer experience

Data Discovery DSAR Automation Scrum Team

May 2021 - June 2022

- Led Front End development as the team's UI subject matter expert through overseeing product initiatives and recommending best practices
- Constructed data lineage visualization using D3.js to enable users to view data connections across tables based on transfers defined within Cosmos DB
- Performed product demonstrations weekly to 30+ coworkers to receive feedback and improve features before deploying to production
- Mentored new developers by answering technical questions, demonstrating processes and coding standards, and providing advice on efficient development

Data Subject Access Requests (DSAR) Scrum Team

July 2019 - May 2021

- Developed features that assisted companies in receiving and fulfilling requests regarding consumers' personal information to comply with data privacy regulations
- Established new independent product and library for data redaction to protect consumer rights
- Ensured WCAG compliance to allow for an accessible experience for users with disabilities
